Description of the product and its normal use

Image and texts web application is for users who want to share their creative works or who is looking for inspiration.

Short description of the method used and test users

Firstly, the testers allowed to experience our web application on their ways while we observed their performances and noted their comments. After that we provided several tasks for the testers and follow them through each tasks. Finally, they gave us small brief about their experiences.

Testers were students of Metropolia and Laurea.
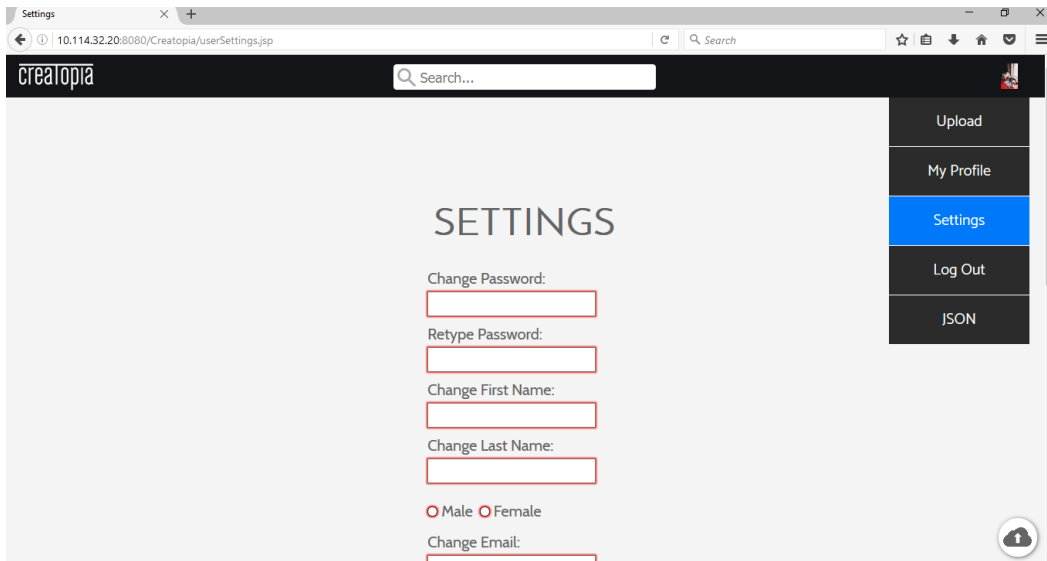

How long was the test

4-10 minutes

Functions that were tested; test scenarios and tasks

- Find out how to sign in from the main pages.
- Try to sign in as fake accounts. Register new users and sign in with the official ones again.
- Find out what users can do.
- Find out how to edit user's profile.
- Upload images.
- Comment on any images.
- Perform a search.
- Log out and use the site as guests.

Result of the test

Things need to be fixed or added:

Profile picture on the top right conner is small in comparison with the rest of site.

Too much space in the settings and register form. User want to see all information without scrolling.

When user want to change avatar, have to change password, Firstname, Lastname, Email… also.

When clicking submit button and scrolling up or down, display issue of alert message.

Like button not work.

Must have some searching recommendations.

Plan for corrections:

We will try to fix all front-end problems first, then like and searching recommendations functions if we have time left.
